

Please reject the NAB petition 04-160, To me it just seems like another infringement on our citizen's rights, that seem to be happened very often over the last couple of years.

XM Radio is an excellent service that in it's own right should be able to provide paid local traffic and weather information. If the petition passed, I would probably end up still listening to XMRadio and NOT listening to broadcast radio for traffic and weather, but checking it on the internet before I leave home or use my cellphone.
